

Kondor Pharma publishes clinical study showing benefit of boswellia serrata extract on cognitive function in patients with traumatic brain injury

FOR IMMEDIATE RELEASE

MISSISSAUGA, Ontario (April 11, 2022) – Kondor Pharma Inc. is pleased to announce the publication of its clinical trial investigating the efficacy of K-Vie™, a proprietary extract of *Boswellia serrata*, on cognitive function in patients with traumatic brain injury (TBI). The study was published in the peer-reviewed journal, *Brain Injury*, 2022 Apr 6; 1-7, and is titled: [Boswellia serrata extract shows cognitive benefits in a double-blind, randomized, placebo-controlled pilot clinical trial in individuals who suffered traumatic brain injury.](#)

Although TBI is a major cause of death and disability, there is currently no effective treatment for this condition. In this randomized, double-blind, placebo-controlled clinical trial, we aimed to assess whether the oral administration of K-Vie™ (the Kondor team trademarked *Boswellia serrata* extract present in Strowell®), in TBI patients would improve cognitive function. Patients received either a placebo (n=34) or K-Vie™ (n=46) over a 3-month period.

TBI sufferers who took K-Vie™ showed a significant improvement in cognitive function compared to placebo across multiple standard, clinical cognitive assessments including the Rey Auditory Verbal Learning Test-Recognition Test (RAVLT), Wechsler adult intelligence Digit Symbol Substitution Test (DSST) and trail-making test part B (TMT-B). These findings suggest that the boswellia extract contained in Strowell® may be a promising supportive therapy for individuals suffering from TBI.

“Head trauma victims can sometimes experience debilitating symptoms post-injury from days to years. Regardless of the severity, inflammation in the brain can occur. Strowell® containing our K-Vie™ *Boswellia serrata* extract, was designed to help our brain clear unwanted inflammatory molecules. We are delighted to show that this product can potentially help TBI sufferers recover better and faster,” said Dr. Ali Riazi, CEO of Kondor Pharma.

About Kondor Pharma

Kondor Pharma Inc. is a Canadian health product developer and manufacturer providing natural, plant-based health products that harness the power of boswellia to address a variety of inflammation-related conditions.
